UNIFICATION OF GERMANY

The Australian Standard Classification of Countries for Social Statistics (ASCCSS), published concurrently with this revision, includes the German Democratic Republic (GDR) and the Federal Republic of Germany (FRG) as separate country units. Although the movement to unify Germany commenced during the development of the ASCCSS, the ABS could not anticipate the outcome, and in particular the timing of unification, at the time the classification was ready for printing.

The unification process is now complete and Germany became officially one country from the 3rd of October 1990. At that time the German Democratic Republic ceased to exist as a separate country, becoming part of the Federal Republic of Germany.

The unification of Germany necessitates a number of amendments to the ASCCSS. The amendments comprise Revision 1.01 of the classification and have been made using the methods outlined on pages 5 and 6 of the Explanatory Notes.

The third level country unit 2304, German Democratic Republic, is deleted from the Minor Group 23, Western Europe. The GDR is now included as part of the country unit 2305, Federal Republic of Germany. The code 2304 will not be re-allocated to any other country unit.

The revised structure of Minor Group 23, Western Europe, is as follows:

23 Western Europe

2301	Austria
2302	Belgium
2303	France
2305	Germany, Federal Republic of
2306	Liechtenstein
2307	Luxembourg
2308	Monaco
2309	Netherlands
2310	Switzerland

As outlined on page 8 of the Explanatory Notes, the ASCCSS classification units have been assigned the 3-digit numeric country codes of the International Organization for Standardisation (ISO), to facilitate input processing of statistical collections. The FRG will retain the ISO code 280. The ISO code of the defunct country unit the GDR, 278, is no longer used.

These changes will also affect the alphabetical and numerical coding indexes included in the classification document. All index entries previously coded to the GDR (ASCCSS code 2304 and ISO code 278) are now coded to the FRG (ASCCSS code 2305 and ISO code 280).

A specification of the amendments comprising Revision 1.01 is attached.

All of these amendments have been incorporated into Version 1.01 of the ASCCSS on floppy disk (ABS Catalogue No. 1270.0).
